Executive Summary

Phase I Activities

HDR Engineering, Inc. received authorization from the Southern California Regional Rail Authority (SCRRA) to conduct a Phase I Environmental Site Assessment (ESA) corridor study for the proposed Simi Valley Double Track and Platform Project (Project or proposed action) along Metrolink's Ventura County Line (VCL) in the City of Simi Valley, Ventura County, California. The Project would enhance operational capacity on Metrolink's VCL by adding an approximate 2.20-mile, east-west segment of second mainline and would increase passenger capacity at the Simi Valley Station by adding an additional platform and pedestrian undercrossing. The Project is located between Mile Post (MP) 436.20 and MP 438.40 along East Los Angeles Avenue. Additionally, to the west of the 2.2-mile segment, an existing signal at Sycamore Drive would be relocated approximately 700 feet west, and a new signal would be installed approximately 2,000 feet west of Erringer Road.

The services provided for this proposed action consisted of the following:

- Provide a description of the Project footprint including current land uses (Sections 2.1 through 2.2)
- Provide a general description of the topography, soils, geology, and groundwater flow (Section 2.3)
- Review reasonably ascertainable and reviewable regulatory information published by federal, state, local, tribal, health, and environmental agencies pertaining to the Project footprint (Section 4.1 through 4.3)
- Review historical data sources for the Project footprint, including aerial photographs, topographic maps, fire insurance maps, other readily available development data (Section 4.4), environmental liens (Section 4.5), and previous environmental investigations, if provided (Section 4.6)
- Conduct an area reconnaissance and an environmental review (including a visual review of adjoining properties) with a focus on indications of hazardous substances, petroleum products, polychlorinated biphenyls, wells, storage tanks, solid waste disposal pits and sumps, and utilities (Section 4.8)
- Determine data gaps in the information obtained and comment on their significance in identifying recognized environmental conditions (REC) for the Project footprint (Section 5)
- Summarize the findings, opinions, and conclusions (Section 6)

Findings

General findings of this assessment include the following:

- The Project footprint is located in the western part of the Transverse Ranges geomorphic province in the Ventura Basin. Simi Valley has accumulated over 500 feet of late Quaternary alluvial sediments. The Project footprint is dominated by alluvium and terraces and is located south of the Simi Fault.

- The Project footprint is located in the Simi Valley groundwater basin, which is alluvium of Pleistocene and Holocene age. The alluvium reaches a maximum thickness of 730 feet but is shallower in the western part of the valley. The Project footprint lies in the Calleguas Creek Watershed. Depth to water ranges from approximately 60 feet below ground surface (bgs) in the western portion of the Project footprint to approximately 20 feet bgs in the eastern portion. Groundwater flow direction is generally to the south-southeast in the direction of Arroyo Simi.
- The Project footprint includes railroad track, ballast, safety fencing, switches, control points, switch and signal housings, and underground utilities. No habitable structures are located within the Project footprint.
- The Project footprint is located along East Los Angeles Avenue, a commercial thoroughfare (e.g., retail and gasoline service stations) with residential development north and south of the railroad.
- The search of government environmental databases returned 524 regulatory listings within the search radius. No sites were determined to be of concern to the Project footprint based on database listings and distance.
- Historical records review determined that the railroad has been present within the Project footprint since at least 1903. Prior to the 1950s, the surrounding land use was primarily agricultural before being developed into its current residential, commercial, and industrial uses.

Opinions

HDR reviewed the stated data sources, which are part of the ASTM International (ASTM) E1527-13 assessment protocol. Based on the review of the data, HDR developed the following professional opinions:

- Pesticides and herbicides used on railroad right-of-way (ROW) prior to the 1950s were generally heavy metals-based until the development and use of modern, soluble organic chemicals in recent decades. The use of these chemicals may have impacted shallow soils near the tracks with toxic metals, such as lead and arsenic. The site's historical use as a railroad ROW prior to the 1950s is indicative of an accumulation of heavy metals and pesticides/herbicides in shallow soil and is considered a REC.
- Aerially deposited lead is typically found in shallow soil that is located adjacent to a major roadway that has existed since the decades when leaded gasoline was in widespread use. The Project footprint is located adjacent to East Los Angeles Avenue, a major road that matches this description. Therefore, lead accumulation in shallow soil within the Project footprint is considered a REC.
- The surrounding area was primarily farmland prior to residential development that occurred during the 1950s and 1960s. The likely application of pesticides via spraying, or pesticide contamination resulting from stormwater runoff, is considered a REC.

Conclusions

HDR concludes that the following three RECs have been identified for the Project footprint:

- Heavy metals in soil from historical pesticide/herbicide use on the railroad
- Aerially deposited lead in shallow soil within the Project footprint
- Pesticides in soil from historical surrounding farmland

Recommendations

Based on the three identified RECs associated with the Project footprint, HDR makes the following recommendations.

- **Recommendation 1:** HDR recommends that construction contractors should be instructed to immediately stop subsurface activities in the event that previously unidentified significantly stained soil is found during construction. Contractors should be instructed to follow applicable regulations regarding discovery, response, and disposal for hazardous materials or stained soil encountered during the construction process.
- **Recommendation 2:** HDR recommends that the following standard plans be prepared prior to Project construction:
 - A general construction soil management plan that includes general provisions for how soils would be managed within the Project footprint for the duration of construction
 - A health and safety plan that meets the requirements of the Occupational Safety and Health Administration and is protective of site workers that may be handling contaminated material

This page is intentionally blank.

1 Introduction

1.1 Purpose

The purpose of this Phase I ESA is to evaluate the Project footprint for indications of RECs. Although this report follows generally accepted procedures accepted under ASTM E1527-13, the purpose of this report is for transportation evaluation and not for property transaction. Therefore, all appropriate inquiry is not the objective. The objective is to identify environmental conditions that would document an adverse impact on the Project footprint. ASTM Practice E1527-13 defines the following categories of RECs.

- **REC:** The presence, or likely presence, of any hazardous substances or petroleum products in, on, or at a property due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not RECs.

ASTM E 1527-13 defines “release” as a release of any hazardous substance or petroleum product shall have the same meaning as the definition of release in the Comprehensive Environmental Response, Compensation, and Liability Act 42 United States (U.S.) Code Section 9601(22).

- **Historical REC:** A historical REC is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).
- **Controlled REC:** A controlled REC is defined as resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Additional conditions that are not included under the definitions of a REC but are defined by ASTM Practice E1527-13 include the following.

- **De Minimis:** *De minimis* is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs or controlled RECs.
- **Business Environmental Risk:** These are risks that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

Consideration of business environmental risk issues may involve addressing one or more nonscope considerations.

1.2 Report Users

HDR received authorization from the SCRRA to conduct a Phase I ESA for the proposed action. The proposed action includes construction of a new second mainline track within SCRRA and Union Pacific Railroad's existing ROW, hereafter referenced as the Project footprint, which extends from Sequoia Avenue at MP 436.20 to Stearns Street at MP 438.20 on Metrolink's VCL in Ventura County, California. This Phase I ESA has been prepared for SCRRA as the client (the User of the report), and only the client has the right to rely on the contents of this Phase I ESA without written authorization.

1.3 Scope of Services, Significant Assumptions, and Limitations

The services provided for this proposed action consisted of the following:

- Provide a description of the Project footprint including current land uses (Sections 2.1 through 2.2)
- Provide a general description of the topography, soils, geology, and groundwater flow (Section 2.3)
- Review reasonably ascertainable and reviewable regulatory information published by federal, state, local, tribal, health, and environmental agencies pertaining to the Project footprint (Section 4.1 through 4.3)
- Review historical data sources for the Project footprint, including aerial photographs, topographic maps, fire insurance maps, other readily available development data (Section 4.4), environmental liens (Section 4.5), and previous environmental investigations, if provided (Section 4.6)
- Interview the current owner and other persons that have knowledge of the development history of the Project footprint (Section 4.7)
- Conduct an area reconnaissance and an environmental review (including a visual review of adjoining properties) with a focus on indications of hazardous substances, petroleum products, polychlorinated biphenyls, wells, storage tanks, solid waste disposal pits and sumps, and utilities (Section 4.8)
- Determine data gaps in the information obtained and comment on their significance in identifying RECs for the Project footprint (Section 5)
- Summarize the findings, opinions, and conclusions (Section 6)

The goal of this scope of services is to identify RECs that may affect construction of the proposed action and determine the appropriate level of any subsequent studies that may be required, such as Phase II ESAs. This corridor-level assessment does not provide a definitive determination of the actual presence or absence of contamination and would not meet the innocent landowner provision under the Comprehensive Environmental Response, Compensation, and Liability Act, which establishes a defense for the purchase of real property.

A User is defined by ASTM Practice E1527-13 as the party seeking to use Practice E1527 to complete a Phase I ESA of the Project footprint and may include a potential purchaser of land in the Project footprint, a potential tenant of the Project footprint, an owner of land in the Project footprint, a lender, or a manager. Investigative areas not included in the standard ASTM Phase I ESA scope include asbestos, lead-based paint, lead in drinking water, radon or urea formaldehyde, wetland issues, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, and high-voltage power lines.

Indoor air quality impacts from sources such as mold and asbestos are not included in the ASTM standard, except to the extent that indoor air impacts are related to Superfund releases and/or caused by releases of hazardous substances into subsurface soil or groundwater (vapor intrusion).

The potential for vapor encroachment or intrusion into structures in the Project footprint are considered and identified from on-site or off-site sources based on the experience of the environmental professional.

The scope of services for Phase I ESA projects also does not include the completion of soil borings, the installation of groundwater monitoring wells, or the collection of soil or groundwater samples.

HDR has made assumptions in preparing the scope of this assessment:

- Data gathered from public information sources (e.g., libraries or public regulatory agencies) are accurate and reliable.
- Site operations reflect site conditions relative to potential releases, and no intentional concealment of environmental conditions or releases has occurred.
- Interview information is directly reported as gathered by the assessor and is limited by the accuracy of the interviewee's recollection and experience.
- Published geologic information and site observations made by the environmental professional are used to estimate likely contaminant migration pathways in the subsurface. These estimates by the environmental professional are limited in accuracy and are generally cross-referenced with existing information about similar sites and environmental releases in the area.
- Regulatory information is limited to sites identified after the late 1980s because reliable records were not kept by regulatory agencies prior to that time frame.

The findings and conclusions presented in this report are based on the procedures described in ASTM Practice E1527-13, informal discussions with various agencies, a review of the available literature cited in this report, conditions noted at the time of this Phase I ESA, and HDR's interpretation of the information obtained as part of this Phase I ESA. The findings and conclusions are limited to the proposed action and properties described in this report and by the accuracy and completeness of the information provided by others.

A Phase I ESA cannot entirely eliminate uncertainty regarding the potential for RECs. Conducting this assessment is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a Project footprint within reasonable limits of time and cost. In conducting its services, HDR used a degree of care and skill ordinarily exercised under similar circumstances by reputable professionals practicing in the same locality. This Phase I ESA conforms to the level of documentation required in ASTM Practice E1527-13. HDR may omit discussion of certain records, such as sources deemed to be inapplicable or of limited value to the specific needs of this client, in HDR's professional opinion. In accordance with ASTM, if the lack of available documentation results in a data gap, this data gap is identified herein, and its significance is discussed.

2 Site Description

2.1 Location, Legal and Project Description

The Project footprint consists of SCRRA's and Union Pacific Railroad's existing ROW along an approximate 2.2-mile, east-west segment of SCRRA's Ventura Subdivision, which extends from Sequoia Avenue at MP 436.20 to Stearns Street at MP 438.40. The segment runs parallel to East Los Angeles Avenue in the City of Simi Valley in Ventura County, California (Figure 2-1). The Project footprint (Figure 2-2) additionally includes a new signal installation approximately 2,000 feet west of Erringer Road and a relocation of an existing signal at Sycamore Drive, approximately 700 feet to the west. Each new signal site would include the installation of a 6-foot by 8-foot signal house with a security fence, wayside signal, 40-foot positive train control antenna tower, 200-amp Southern California Edison power meter pedestal, and underground railroad fiber optic cable with vault.

The Project would enhance operational capacity and add an additional platform and pedestrian undercrossing at Simi Valley Station. Rail improvements include at-grade crossing improvements at Sequoia Avenue, Tapo Canyon Road, Tapo Street, and Hidden Ranch Drive and the construction of new rail infrastructure.

Table 2-1 summarizes parcels required for acquisition near the Simi Valley Station either as a temporary construction easement (TCE) or permanent fee (Regency Right-of-Way Consulting 2020).

Table 2-1. Required Parcel Acquisitions

644-0-210-115	ESG Properties LLC	Multifamily dwellings (10+ units)	2.21	47	Fee

Notes:

TCE=temporary construction easement; Fee=fee simple estate

2.2 Site and Vicinity Characteristics

The United States Geological Survey (USGS) 7.5-minute topographic map series (quadrangle maps for Simi Valley East and Calabasas, California) indicate the general topography along the railroad is flat in the western portion of the Project footprint with increasing elevation eastbound. The Project footprint's elevation generally ranges from 950 feet above mean sea level in the western terminus with increasing elevation to approximately 980 feet above mean sea level in the eastern terminus.

The Project footprint is located along East Los Angeles Avenue, a commercial thoroughfare (e.g., retail and gasoline service stations) with residential development north and south of the railroad.

2.3 Area Geology and Hydrogeology

2.3.1 Regional Geology

The Project footprint is located in the western part of the Transverse Ranges geomorphic province that comprises chains of mountain ranges that extend east-west. The mountain ranges are separated by valleys, one of which is Simi Valley. Simi Valley is located in the central portion of the Ventura Basin, an east-west trending synclinal trough containing 40,000–50,000 feet of principally Tertiary marine clastic rocks structurally characterized by major east-west thrust faults and tightly folded anticlinal trends (Cole 1969). The Ventura Basin is filled with more than 20,000 feet of upper Miocene, Pliocene, and Quaternary sandstone, shale, and conglomerate deposited in a rapidly subsiding zone between two flanking uplifts that shed clastic sediments into the deepening trough (USGS 2017).

Simi Valley has accumulated over 500 feet of late Quaternary alluvial sediments from erosion of the surrounding hills and mountains. Younger alluvium is present on the valley floor, whereas older alluvium is exposed along the margins of the valley. Higher elevations are underlain primarily by bedrock of the Tertiary-age Santa Susana, Lajas, and Sespe formations. The Project footprint is dominated by alluvium and terraces and is located south of the Simi Fault (Squires 1997).

2.3.2 Regional Hydrogeology

The Project footprint is in the Simi Valley groundwater basin, which is alluvium of Pleistocene and Holocene age. The alluvium reaches a maximum thickness of 730 feet but is shallower in the western

part of the valley (Burton et. al. 2011). The Project footprint also lies in the Calleguas Creek Watershed (Watersheds Coalition of Ventura County 2017).

2.3.3 Local Hydrogeology

Groundwater depths were retrieved from the California Department of Water Resources' online Water Data Library (Department of Water Resources 2020). The California Department of Water Resources provides historic groundwater-level data from stations throughout the state. Two wells were found in the vicinity of the Project footprint:

- An active well of unknown use was located approximately 600 feet northeast of the Simi Valley Station, and depth to water was measured at approximately 22 feet bgs.
- An active well with an "other" use was located approximately 2.75 miles west of MP 436.20 and the depth to water was measured at approximately 93 feet bgs.

Geotechnical data collected during California's delineation of seismic hazard zones per the Seismic Hazards Mapping Act of 1990 indicate depth to groundwater in the Project footprint ranges from approximately 60 feet bgs in the western portion to approximately 20 feet bgs in the eastern portion (California Department of Conservation 1997).

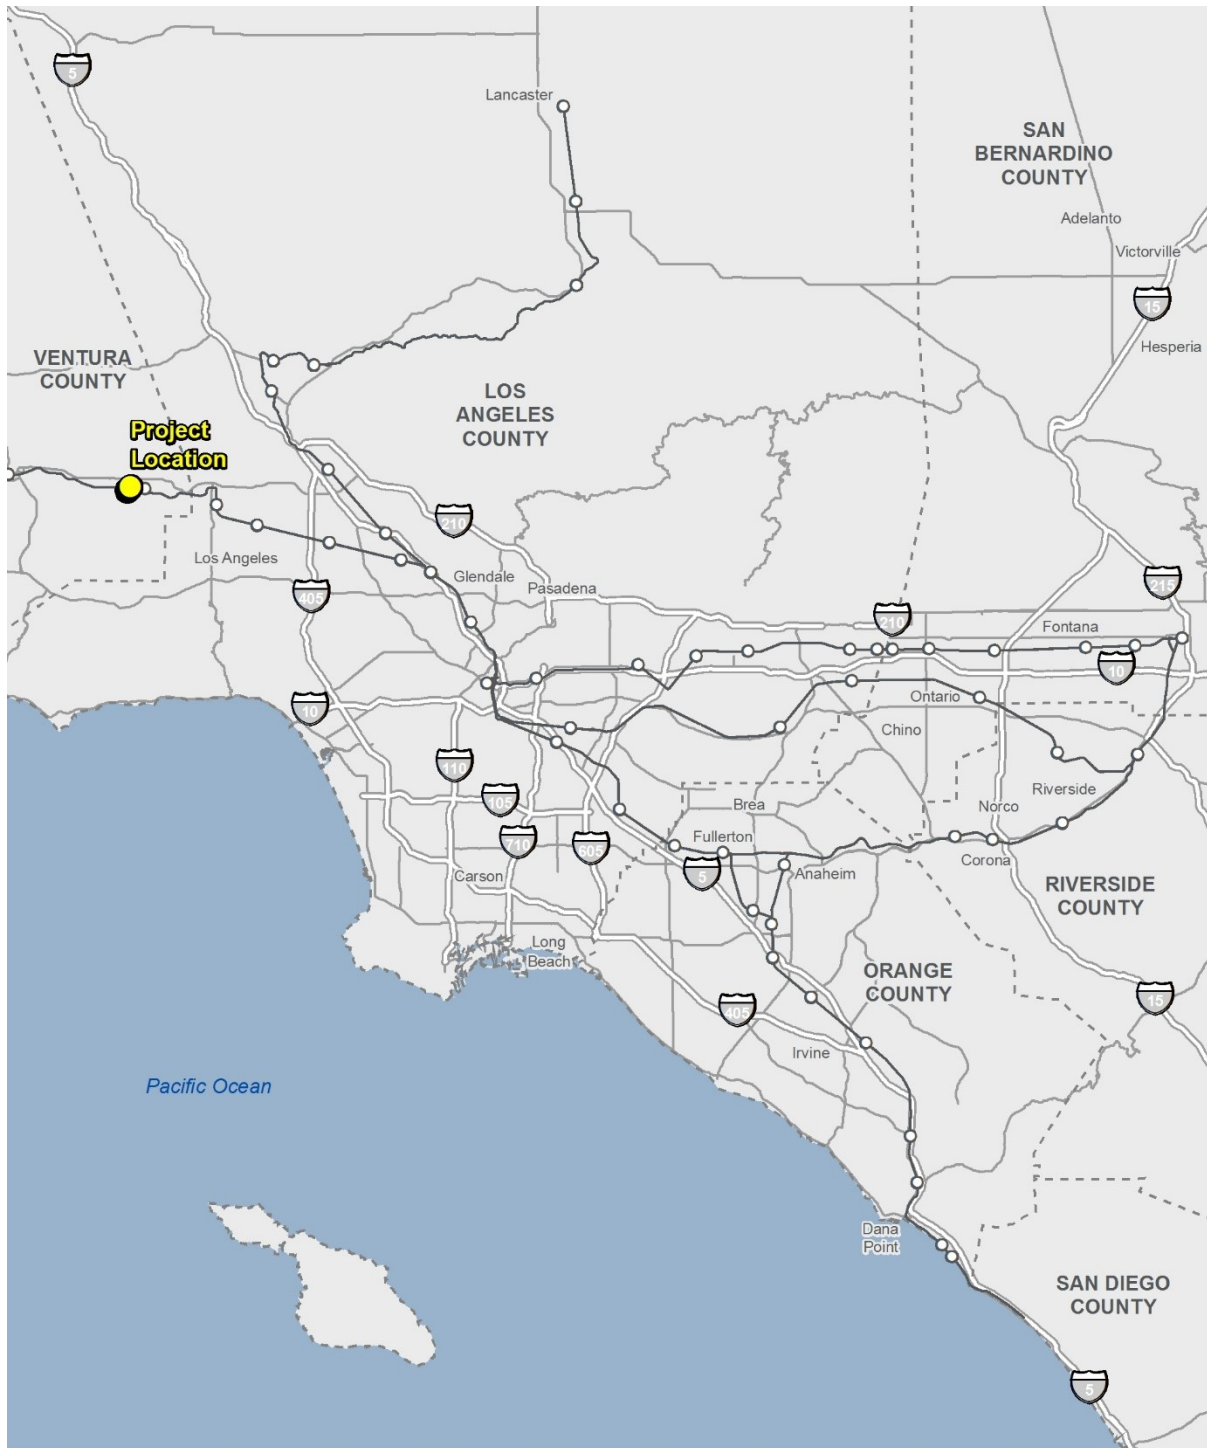

Groundwater flows to the south-southeast in the direction of Arroyo Simi.

2.4 Oil Fields and Wells

HDR searched online records from the California Geologic Energy Management Division's Well Finder tool for locations of wells and oil fields (California Department of Conservation Geologic Energy Management Division 2021). The Project footprint is not located within any oil fields. No gas, oil, or geothermal wells were identified within the Project footprint.

3 User-Provided Information

The User of the report provided HDR with the limits of the Project footprint, computer-aided design drawings of the Project footprint, and a Project description. The Project description states the purpose of the Project is to increase operational capacity on Metrolink's VCL by adding a second track and improving the Simi Valley Station, but it does not provide proposed excavation depths. The Phase I ESA was requested to be conducted in general conformance with ASTM E1527-13 standard. No additional information was provided.

This page is intentionally blank.

4 Records Review

4.1 Environmental Records Review

Environmental Data Resources, LLC (EDR) was contracted by HDR to complete a computerized environmental information database search for the Project footprint on January 13, 2021. HDR provided EDR with the Project footprint boundaries and search parameters (a 0.5-mile buffer zone around the Project footprint), which determined the Project footprint with EDR buffer zone. The database search included federal, state, local, and tribal databases as defined by ASTM E1527-13, in addition to EDR proprietary databases. The results of the database search are summarized in Table 4-1. A complete copy of the EDR environmental database report is included in Appendix A.

4.1.1 Summary of Listed Records

The EDR database search resulted in 524 regulatory listings (Table 4-1) within the EDR buffer zone (Figure 4-1). No regulatory listings were noted in the EDR report (Appendix A) as potential concern to the Project footprint.

In the state of California, several databases exist for the purpose of tracking underground storage tanks (UST). Many of the databases are no longer updated, and limited information is available for the sites listed in these databases (HIST UST, SWEEPS UST, and CA FID UST). While some overlap of sites exists among the databases, each database may contain sites not listed elsewhere, and often the sites identified in these databases are not listed in the current state UST database. Due to the lack of updated and consistent information, the most accurate information regarding many of the UST regulatory listings identified for the Project footprint cannot be verified without site-specific interviews or supporting agency documentation.

Table 4-1. Summary of Environmental Database Search

Database	Description	Records Listed within the EDR Buffer Zone	Potential Concern to the Project Footprint
<i>Federal</i>			
SEMS	Superfund Enterprise Management System (formerly known as the Comprehensive Environmental Response, Compensation, and Liability Information System). The list contains data on potentially hazardous waste sites that have been reported to the U.S. EPA.	2	0
SEMS-ARCHIVE	Superfund Enterprise Management System Archive (formerly known as the Comprehensive Environmental Response, Compensation, and Liability Information System-No Further Remedial Action Planned). Archived sites have been removed from the SEMS inventory.	1	0

Table 4-1. Summary of Environmental Database Search

Database	Description	Records Listed within the EDR Buffer Zone	Potential Concern to the Project Footprint
RCRA Generators	The U.S. EPA regulates all Hazardous Waste Generators subject to the Resource Conservation and Recovery Act. They are classified by the quantity of hazardous waste generated. A small quantity generator generates between 100 kilogram and 1,000 kilogram of waste per month. A large quantity generator generates over 1,000 kilogram of waste per month. A Very small quantity generator small quantity generator generates less than 100 kilogram of waste per month.	24 (small quantity generator) 7 (large quantity generator) 2 (very small quantity generator)	0 (small quantity generator) 0 (large quantity generator) 0 (conditionally exempt small quantity generator)
RCRA-NonGen/NLR	The Resource Conservation and Recovery Act enacted by Congress in 1976; amended in 1984 with the Hazardous and Solid Waste Amendments. Database includes selective information on sites which generate, transport, store, treat, and/or dispose of hazardous waste. Nongenerators (NonGen) do not presently generate hazardous waste or are no longer reported.	147	0
State, Local, and Tribal			
ENVIROSTOR	California DTSC Site Mitigation and Brownfields Reuse Program's EnviroStor database identifies sites that have known contamination or sites that may require further investigation. The database includes the following site types: federal superfund sites (National Priorities List), state response, including military facilities and state superfund, Voluntary Cleanup, and School sites. EnviroStor provides information including, identification of formerly contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts on public health and the environment at contaminated sites.	10	0
CA SWF/LF	The solid waste facilities/landfill sites come from the Integrated Waste Management Board's Solid Waste Information System that contains inventory of solid waste disposal facilities and landfills	1	0
CA LUST	LUST Incident Report – SWRCB LUST records contain an inventory of reported LUST incidents.	58	0
CA CPS-SLIC	The spills, leaks, investigations, and cleanup program is designated to protect and restore water quality from spills, leaks and similar discharges. Statewide spills, leaks, investigations, and cleanup cases are maintained by the SWRCB.	6	0

Table 4-1. Summary of Environmental Database Search

Database	Description	Records Listed within the EDR Buffer Zone	Potential Concern to the Project Footprint
CA UST	UST as regulated under Subtitle I of the Resource Conservation and Recovery Act, data source from the SWRCB Hazardous Substance Storage Container Database.	16	0
CA AST	AST - SWRCB provides listing of ASTs Waste Management Unit Database System – SWRCB maintains a list of waste management systems, including active and inactive, permitted and nonpermitted solid waste disposal facilities, transfer stations and waste haulers.	8	0
CA VCP	Contains low threat level properties with either confirmed or unconfirmed releases and the proposed action proponents have request that California DTSC oversee investigation and/or cleanup activities.	2	0
CA SWRCY	A listing of solid waste recycling facilities in the state of California, provided by the Department of Conservation.	3	0
CA CERS HAZ WASTE	A list of California EPA regulated sites for hazardous chemical management, hazardous waste on-site treatment, household hazardous waste collection, and hazardous waste generator programs	60	0
SWEEPS UST	Statewide Environmental Evaluation and Planning System. This UST listing was updated and maintained by a company contacted by the SWRCB in the early 1990s. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.	10	0
HIST UST	The Hazardous Substance Storage Container Database is a historical listing of UST sites previously maintained by SWRCB. Current data can be found in the state or local UST database.	13	0
FID UST	The Facility Inventory Database contains active and inactive UST locations.	7	0
CA CERS TANKS	California Environmental Reporting System Tanks – the California EPA AST and UST program	11	0
FINDS	The Facility Index Database System is a U.S. EPA/National Technical Information Service database that contains both facility information and pointers to other sources of information that contain more detail.	2	0

Table 4-1. Summary of Environmental Database Search

Database	Description	Records Listed within the EDR Buffer Zone	Potential Concern to the Project Footprint
ECHO	Enforcement and Compliance History Information provides integrated compliance and enforcement information for approximately 800,000 facilities nationwide.	1	0
CA CORTESE	Cortese hazardous waste and substances sites list designated by the SWRCB (LUST), the Integrated Waste Board (solid waste facility/landfill), and California DTSC (Cal-Sites)	35	0
CA DRYCLEANERS	A list of drycleaner related facilities that have U.S. EPA identification numbers	3	0
CA HAZNET	Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by California DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments.	3	0
CA HIST CORTESE	Cortese Hazardous Waste and Substances Sites – The California EPA Office of Emergency Information previously maintained a list of sites designated as LUST, solid waste facilities/landfill or Cal-Sites. The list is no longer updated, and cases are maintained by the SWRCB, Integrated Waste Management Board and California DTSC.	26	0
CA NPDES	Listing of all National Pollutant Discharge Elimination System permits including stormwater.	1	0
CA CIWQS	California Integrated Water Quality System to track environmental permits and violations	1	0
CA CERS	California EPA regulated site portal database that combines data from a variety of state and federal sources	9	0
CA HWTS	Hazardous Waste Tracking System	5	0
VENTURA CO. BWT	The Business Plan, Hazardous Waste Producers, and Operating Underground Tanks Site Address List indicates by site address whether Environmental Health Division has a Business Plan, Waste Producer, and/or Underground Tank information	34	0
EDR Proprietary Records			
EDR US Hist Auto	Historical Auto Stations – Gas stations/filling stations/service station establishments.	16	0

The EDR report included 524 listings in the federal, state, local, or tribal databases for the Project footprint 0.5-mile buffer zone and database search area. HDR reviewed the listings identified within the database search area. Listings or sites that were identified by the environmental professional as within 0.5 mile of the Project footprint are listed in Table 4-1. No listings were of concern to the Project footprint based on factors such as distance, hydraulic gradient, geology, or clean-up status.

4.1.2 Orphan Sites

A review of the orphan summary (unmappable sites due to insufficient address information) listed no additional sites of concern to the Project footprint; however, 274 records were listed in the CA HWTS, CA VENTURA CO. BWT, ERNS, CA EnviroStor, CA CPS-SLIC, CA UST, CA HIST UST, HMIRS, CA CHMIRS, RCRA NonGen/NLR, FINDS, ECHO, CA EMI, CA HAZNET, CA HWTS, CA NPDES, CA CIWQS, and ERNS databases.

4.2 Well Search

HDR contracted EDR to complete a well search for the Project footprint on January 12, 2021. There were no water, oil, or gas wells located within the Project footprint area. The well search indicated the central and eastern portions of the Project footprint are within a 100-year flood zone.

4.3 Additional Regulatory Information

HDR used the GeoTracker search tool (geotracker.waterboards.ca.gov), the California SWRCB Environmental cleanup site information database, the EnviroStor search tool (www.envirostor.dtsc.ca.gov), and the California Environmental Protection Agency (EPA) Department of Toxic Substances Control (DTSC) cleanup site information database for additional information about sites in the vicinity of the Project footprint.

4.3.1 Online Sources/Agency File Review

An agency file review was completed using the California DTSC's EnviroStor online database (DTSC 2021) and the Regional Water Quality Control Board's Geotracker (California State Water Resources Control Board [SWRCB] 2021) online database to obtain supporting regulatory documentation. Both services provide a document storage site for governing agencies, enabling the public to access file documentation. No environmental sites of interest were located in the vicinity of the Project footprint.

GeoTracker did not identify any open leaking underground storage tank (LUST), cleanup program sites, or military sites in the vicinity of the Project footprint. EnviroStor did not provide additional information of sites in the vicinity of the Project footprint.

4.4 Historical Use Information

The objective of reviewing historical use information is to develop a history of previous land uses in the vicinity of the Project footprint. This information was used to assess the previous land uses for potential hazardous materials impacts that may affect the proposed action. HDR reviewed those historical sources that were reasonably ascertainable and likely to provide useful information, as defined by the ASTM standard.

4.4.1 City Directory Information

City directory information was not reviewed as part of this Phase I ESA.

4.4.2 Historical Aerial Photographs

Historical aerial photographs are valuable for the environmental assessor to review features of the Project footprint and surrounding properties over a long period of time. HDR reviewed USGS historical aerial photographs for the following years: 1947, 1952-53, 1959, 1967, 1969, 1978, 1985-86, 1994-95, 2005, 2010, 2014, and 2020 (Appendix B). The USGS photographs cover a large geographic area and are taken at a high altitude. To obtain greater land use detail for the Project footprint, HDR reviewed online historical aerial photographs (Nationwide Environmental Title Research 2021).

Historical aerial photographs indicated the presence of the entire railroad as early as 1947. The area was primarily farmland in the earliest aerial photographs, with increased residential development in the western portion of the Project footprint in 1952. By 1967, the Project footprint area was densely residential and increased in the subsequent photographs. California State Route 118 (Simi Valley Freeway) located north of the Project site began construction after 1967 and was completed by 1978. The area's dense development was completed by 1978 and remained relatively unchanged through 2020.

4.4.3 Historical Topographic Maps

Historical USGS 7.5-minute topographic map series maps provided by EDR were reviewed as part of this Phase I ESA (Appendix C). These maps served to augment land use information gathered in the historic aerial photograph review. Historical topographic maps provide an overview of the area relative to potential previous land uses.

Quadrangle maps reviewed include Calabasas (1952, 1967, and 2012), Santa Susana (1951 and 1969), and Simi Valley East (1969 and 2012).

Historical USGS 15-minute topographic map series maps provided by EDR were also reviewed. Maps reviewed include Calabasas (1903, 1944, and 1947) and Santa Susana (1903, 1941, 1943, and 1947).

The railroad was present in the 1903, 1941, 1943, and 1947 maps that only showed the eastern portion of the Project footprint. Santa Susana Airport was located adjacent and to the south of the eastern portion of the Project footprint in the 1951 map. A trailer park was located adjacent and to the east of the eastern portion of the Project footprint in the 1967 map, along with increased residential development in the area and the Simi Valley Freeway to the north. Increased residential development was mapped in the area of the 2012 map.

HDR reviewed online historical topographic maps of the Project footprint provided by Nationwide Environmental Title Research for the following years: 1921, 1927, 1937, 1944, 1952, 1955, 1963, 1968, 1970, 1973, 1991, 2012, 2015, and 2018 (Nationwide Environmental Title Research 2021). The review of these historical topographic maps did not yield additional information.

4.4.4 Fire Insurance Maps

Fire insurance maps were not available for review as part of this Phase I ESA as the property was unmapped. Supporting documentation provided by EDR is provided in Appendix D.

4.5 Environmental Liens, Activity Use Limitations, and Additional Information

Because the proposed action is planned to be constructed almost entirely within existing railroad ROW, an environmental lien search was not conducted as part of this Phase I ESA.

4.6 Summary of Previous Environmental Investigations

The User did not provide HDR with previous environmental investigations of parcels in the Project footprint. HDR did not locate previous environmental investigations during this Phase I ESA.

4.7 Interviews

Interviews were not conducted for this Phase I ESA.

4.8 Site Reconnaissance

HDR conducted a site reconnaissance for the Project footprint on February 2, 2021. The field reconnaissance was conducted on foot from the public ROW and from other publicly accessible areas, when feasible. The weather during the site visit was mild, with temperatures in the 60 degrees Fahrenheit range and clear skies. The purpose of the field reconnaissance was to identify field conditions that indicate releases affecting the Project footprint, locate potential contaminant sources adjacent to the Project footprint (e.g., aboveground storage tanks [AST] or hazardous waste storage areas), note general site conditions, and identify unlisted sites in the vicinity of the Project footprint that may use, store, or transport hazardous materials or wastes. Photographs taken during the site reconnaissance and additional details are included in Appendix E.

The Project footprint was an active Metrolink rail ROW, consisting of a single track on crushed rock ballast. One passenger platform was located on the Project footprint, near the eastern extent. Also located near the eastern extent were storm drains and surface drainage channels, which flow from east to west. Along the Project footprint corridor, multiple signal houses, communications towers, switch houses, and electrical vaults were present. The presence of underground utilities such as high-pressure gas transmission and fiber optic communications was indicated by dig alert markers. The Project footprint widens to accommodate a proposed construction laydown area near the Los Angeles Avenue grade crossing. This area of undeveloped land had storm drains and remnants of concrete footings and was bordered by a bicycle path on the southern and western sides. On the northern side of the Project footprint at the Los Angeles Avenue grade crossing, a large property was under construction adjacent to a lumber storage yard.

The Project footprint was bordered by primarily residential properties to the north and Los Angeles Avenue to the south. Some commercial and retail businesses were located on the southern side of East Los Angeles Avenue. Between Tapo Street and the East Los Angeles Avenue grade crossing, a lumber storage yard and railroad spur were located to the north of the Project footprint.

The Project footprint did not include habitable structures or enclosed buildings. Staining or other signs of releases were not present within the Project footprint. No pits, ponds, lagoons, unmarked chemical containers, indications of previous investigations, tanks, stressed vegetation, solid waste, waste-water, wells, or septic systems were present within the Project footprint.

4.9 Utilities and Polychlorinated Biphenyls

Typical underground utilities, such as electrical and telecommunications cable, were located within the Project footprint, as were storm drains and natural gas transmission lines. Overhead pole-mounted or pad-mounted electrical transformers were not located within, or directly adjacent to, the Project footprint. Indications of polychlorinated biphenyl use were not present within the Project footprint.

4.10 Vapor Intrusion Potential

According to U.S. EPA guidance, vapor intrusion is a general term for migration of the vapor phase of volatile organic compounds from any subsurface contaminant source, such as contaminated soil or groundwater, through the soil and into an overlying building. The three general classes of volatile organic compounds that account for a large number of soil and groundwater contamination sites in the U.S. are petroleum hydrocarbons, nonpetroleum hydrocarbon fuel additives, and chlorinated solvents.

The potential for vapor intrusion was evaluated for the proposed action. Based on the lack of significant volatile organic compounds sources in the vicinity of the Project footprint, HDR determined that vapor intrusion potential was not a significant risk to the Project footprint.

4.11 Railroad Right-of-Way

Some environmental conditions are typical of railroad ROW and are not necessarily representative of a point-source release to the environment. Examples include aerially deposited lead impacts on shallow soil, lubricating oil or hydraulic oil from locomotives dripping onto ballast, asbestos fiber dust from brakes, wooden ties treated with creosote or other wood preservative chemicals, and herbicide/pesticide use prior to the development of modern organic herbicides and pesticides.

Aerially deposited lead is typically found in shallow soil located adjacent to a major roadway that has existed since the decades when leaded gasoline was in widespread use. Much of the Project footprint is located adjacent to East Los Angeles Avenue, a major road that matches this description. Therefore, shallow soil within the Project footprint may contain elevated concentrations of lead.

Lubricating and hydraulic oils typically impact the crushed rock base that makes up the ballast directly beneath the tracks. The tracks that traverse the Project footprint are not used for locomotive storage or maintenance. Some ballast exhibited staining. However, no significant staining or indications of major releases were present. Therefore, oil impacts are not expected to be significant. Similarly, asbestos fiber dust from brakes deposited adjacent to the tracks would not be significant.

Wooden railroad ties, historically treated with creosote, pentachlorophenol, or other wood preservative chemicals to prevent rot and insect infestation, require disposal as treated wood waste after removal. The chemicals also have the potential to impact soil directly in contact with the ties by slowly leaching over decades. While the ballast directly in contact with the ties is not likely to be significantly contaminated, the wooden ties themselves within the Project footprint would likely require special handling and disposal.

Prior to the 1950s, herbicides and pesticides were generally composed of toxic metals, such as lead and arsenic. While modern herbicides and pesticides tend to be either water soluble or short lived in the environment, heavy metal compounds persist, adsorbed onto soil. Because the railroad tracks have existed within the Project footprint since at least 1903, shallow soil may still be impacted by lead and arsenic.

This page is intentionally blank.

5 Data Gap Analysis

The ASTM E 1527-13 standards require a listing of data gaps, including data failure, encountered during the investigative process that may affect the validity of the conclusions drawn by the environmental professional. The ASTM E 1527-13 standard also requires that the environmental professional estimate the relative importance of the data gaps. Generally, gaps in available data are related to the availability of historical data sources for specific sites of concern. The environmental professional uses multiple historical data sources as a method to provide coverage for data gaps. Historical information is collected on a recurring basis, and the passage of time between data sets may or may not constitute a significant gap in data coverage.

For the proposed action, the following data gaps were noted, as defined by ASTM E 1527-13:

- No information about the environmental history of the Project footprint provided by the User
- No persons to interview with historic knowledge of the Project footprint
- No access to private properties for reconnaissance
- Lack of fire insurance maps
 - This constitutes a significant data gap due to a lack of detailed historical land uses within, and adjacent to, the Project footprint
- Lack of city directory records
 - This does not constitute a significant data gap due to the Project footprint being primarily within the ROW

No information about the environmental history of the Project footprint is a significant data gap, as available public records are not likely to contain information related to railroad incidents or environmental reports prepared for previous construction projects. The lack of interviews and limitations of property access are not considered to be a significant data gaps, based on other available supporting historical information and supporting agency documentation.

This page is intentionally blank.

6 Findings, Opinions, and Conclusions

HDR has conducted a Phase I ESA of the proposed action located in the City of Simi Valley, California.

The Phase I ESA was performed in accordance with the scope and limitations of ASTM Practice E 1527-13. Any exceptions to, or deletions from, this practice are described in this report. This Phase I ESA includes a review of an environmental database search report, any additional regulatory documentation, and historical data sources, analysis of conducted interviews, and a summary of the site reconnaissance conducted on June 23 and 24, 2020.

6.1 Findings

General findings of this assessment include the following:

- The Project footprint is located in the western part of the Transverse Ranges geomorphic province, in the Ventura Basin. Simi Valley has accumulated over 500 feet of late Quaternary alluvial sediments. The Project footprint is dominated by alluvium and terraces and is located south of the Simi Fault.
- The Project footprint is located in the Simi Valley groundwater basin, which consists of alluvium of Pleistocene and Holocene age. The alluvium reaches a maximum thickness of 730 feet but is shallower in the western part of the valley. The Project footprint lies in the Calleguas Creek Watershed. Depth to water ranges from approximately 60 feet bgs in the western portion of the Project footprint, to approximately 20 feet bgs in the eastern portion. Groundwater flow direction is generally to the south-southeast in the direction of Arroyo Simi.
- The Project footprint includes railroad track, ballast, safety fencing, switches, control points, switch and signal housings, and underground utilities. No habitable structures are located within the Project footprint.
- The Project footprint is located along East Los Angeles Avenue, a commercial thoroughfare (e.g., retail and gasoline service stations) with residential development north and south of the railroad.
- The search of government environmental databases returned 524 regulatory listings within the search radius. No sites were determined to be of concern to the Project footprint based on database listings and distance.
- Historical records review determined that the railroad has been present within the Project footprint since at least 1903. Prior to the 1950s, the surrounding land use was primarily agricultural before being developed into its current residential, commercial, and industrial uses.

6.2 Opinions

HDR reviewed the stated data sources, which are part of the ASTM E1527-13 assessment protocol. Based on the review of the data, HDR developed the following professional opinions:

- Pesticides and herbicides used on railroad ROW prior to the 1950s were generally heavy metals-based until the development and use of modern, soluble organic chemicals in recent decades. The use of these chemicals may have impacted shallow soils near the tracks with toxic metals, such as lead and arsenic. The site's historical use as a railroad ROW prior to the 1950s is indicative of an accumulation of heavy metals and pesticides/herbicides in shallow soil and is considered a REC.
- Aerially deposited lead is typically found in shallow soil that is located adjacent to a major roadway that has existed since the decades when leaded gasoline was in widespread use. The Project footprint is located adjacent to East Los Angeles Avenue, a major road that matches this description. Therefore, lead accumulation in shallow soil within the Project footprint is considered a REC.
- The surrounding area was primarily farmland prior to residential development that occurred during the 1950s and 1960s. The likely application of pesticides via spraying, or pesticide contamination resulting from stormwater runoff, is considered a REC.

6.3 Conclusions

Based on the findings and opinions detailed in Section 6.1 and Section 6.2, HDR concludes that three RECs have been identified for the Project footprint. The following statement is required by ASTM E1527-13 as a declaration of whether RECs were found within the Project footprint:

HDR has performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527 of an approximately 2.2-mile segment of Metrolink's Ventura County ROW, located along East Los Angeles Avenue, Simi Valley, Ventura County, California (Project footprint). Any exceptions to, or deletions from, this practice are described in previous sections of this report. This assessment has revealed no evidence of RECs in connection with the property except for the following RECs:

- *Heavy metals in soil from historical pesticide/herbicide use on the railroad*
- *Aerially deposited lead in shallow soil within the Project footprint*
- *Pesticides in soil from historical surrounding farmland*

This page is intentionally blank.

7 Recommendations

Recommendations included in this report were developed through the investigative procedures described in Section 1.3. These findings should be reviewed within the context of the limitations provided in the limitations section.

Based on the RECs associated with the Project footprint, HDR makes the following recommendations:

- **Recommendation 1:** HDR recommends that construction contractors should be instructed to immediately stop subsurface activities in the event that previously unidentified significantly stained soil is found during construction. Contractors should be instructed to follow applicable regulations regarding discovery, response, and disposal for hazardous materials or stained soil encountered during the construction process.
- **Recommendation 2:** HDR recommends that the following standard plans be prepared prior to Project construction:
 - A general construction soil management plan that includes general provisions for how soils would be managed within the Project footprint for the duration of construction
 - A health and safety plan that meets the requirements of the Occupational Safety and Health Administration and is protective of site workers that may be handling contaminated material

8 Qualifications of Environmental Professionals

8.1 Signature and Qualification

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in Section 312.10 of 40 Code of Federal Regulations Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquires in conformance with standards and practices set forth in 40 Code of Federal Regulations Part 312.

Morgan Violette

Geologist and Environmental Professional

Andrew Cherene, PG, CHG

Geologist and Environmental Professional

Vincent Carbone, PG (PA, NY, TN, KY, DE)

Professional Associate and Environmental Professional

8.2 Qualifications of Environmental Professionals

This Phase I ESA was performed by the following HDR personnel:

- Morgan Violette has 8 years of experience in assessment of impacted properties and compliance with environmental regulations. She has a Bachelor of Arts in Environmental Studies and Geosciences from Skidmore College (New York) and a Master of Business and Science in Urban Environmental Analysis from Rutgers University – New Brunswick (New Jersey). Violette's experience includes site investigations and assessments of dozens of urban properties in New York City and other parcels in several East Coast states.
- Andrew Cherene, PG, CHG, HDR's qualified environmental professional, as defined by ASTM Practice E 1527-13, has more than 14 years of experience in the assessment and remediation of impacted properties and compliance with environmental regulations. He has a M.S. in Earth Sciences from the University of California, San Diego. Cherene specializes in investigations of hazardous materials-impacted properties for public and private sector clients. His experience covers assessments ranging from public ROW to commercial and industrial facilities located in Southern California.

Quality Assurance/Quality Control was performed by the following HDR personnel:

- Vincent Carbone is a senior geologist at HDR with over 28 years of experience in hazardous waste and petroleum spill site investigations and remediation in the eastern U.S. His experience encompasses Phase I and Phase II assessments; remedial investigations; geophysical studies; feasibility studies; interim remedial measures; site management; and operations, maintenance, and monitoring. Carbone is responsible for the geologic and hydrogeologic interpretation of geology and hydrogeology projects. Carbone has been the environmental manager for several complex decommissioning projects, including Bethlehem Steel and coal fossil plants.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 09-05-2013
Citation: HSC 6.7 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25292(e)
Violation Description: Failure to maintain secondary containment, as evidenced by failure of secondary containment testing.
Violation Notes: Returned to compliance on 09/05/2013.
Violation Division: Ventura County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 437613
Site Name: AT&T California - KD138
Violation Date: 06-25-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site Name: AFFORDABLE AUTO REPAIR SVCS INC
Violation Date: 05-26-2020
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 05/27/2020.
Violation Division: Ventura County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 90056
Site Name: AFFORDABLE AUTO REPAIR SVCS INC
Violation Date: 06-13-2018
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes: Returned to compliance on 04/08/2020.
Violation Division: Ventura County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-11-2019
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Staff conducted NEC inspection. Based on inspection findings, the facility does not qualify for the NEC. For additional details, see attached report. On April 16, 2019, the Discharger sent a photo to Regional Board staff indicating that they had addressed the issues observed during the inspection. Based on the photos, the facility has returned to compliance with the NEC. See attached photo.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D011
Waste Description: SILVER

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

Violation Description: Chapter 16, Section(s) 2712(b)(1)(G)
Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.

Violation Notes: Returned to compliance on 12/01/2015.
Violation Division: Ventura County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 74515
Site Name: TESORO (SHELL) 68621 (WRR 6349)
Violation Date: 07-31-2013
Citation: 23 CCR 16 2715(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(f)

Violation Description: Failure to comply with one or more of the following: provide training to facility employee(s) responsible for proper operation and maintenance every 12 months and/or train new employee(s) who are responsible for proper operation and maintenance within 30-days of hire and/or to have at least one employee present during operating hours that has been trained in the proper operation and maintenance of the UST system.

Violation Notes: Returned to compliance on 08/09/2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 11/22/1994
Comments: The Department completed review of the PEA equivalent report. Based on the information provided in the PEA report, the site does not pose a threat to public health and/or the environment. Therefore, the Department recommended "No Further Action" for the site. In addition, the site is exempted under "petroleum exclusion" Section 25317 of the California Health and Safety Code.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 11/03/1994
Comments: The Department received a draft Voluntary PEA Agreement. The current owners of the property had an underground diesel fuel tank removed in August 1991. TPH contamination detected in the soil. Over 2,500 cubic yards of soil removed from the site. No groundwater contamination noted. Risk assessment conducted. PRP would like to submit these reports to the Department to review and determine if further cleanup is required. The Department accepted their request.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 11/08/1994
Comments: The Department entered into a Preliminary Endangerment Assessment Agreement with the Project Proponents. The Department shall provide oversight for the review of the PEA Equivalent and related documents.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 07/19/1993
Comments: PEA WAS CONDUCTED. APPARENT PROBLEM WAS A RELEASE OF WASTE OIL FROM A STORAGE TANK. AREA WAS EXCAVATED AND CONTAMINATED SOIL WAS DISPOSED OF OFFSITE. PEA FOCUSED ON THIS ONE AREA ONLY. DEPARTMENT CONCURS WITH NFA RECOMMENDATION.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 03/16/1992
Comments: PRIOR TO THE TOYOTA OCCUPANCY IN 1987 THE SITE WAS AN UNDEVELOPED LAND. TOYOTA HAS BEEN THE ONLY OCCUPANT SINCE THE DEVELOPMENT. A RELEASE OF WASTE OIL WAS DISCOVERED IN NOVEMBER 1991 FROM A PIPE CONNECTING THE ABOVE GROUND WASTE OIL TANK. ON FEBRUARY 28, 1992, RP SUBMITTED THE REQUEST TO THE DEPT TO INITIATE A PEA. ON MARCH 13, 1992, THE DEPT MAILED A LETTER TO THE RP ACKNOWLEDGING THE RECEIPT OF THE ABOVE LETTER.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 03/25/1993
 Comments: The Department received a PEA report on January 12, 1993. On March 25, 1993, the Department completed review of the PEA. Approximately 50 gallons of diesel fuel was released to the subject site when a truck ran off the freeway at the location of the site. Removal of 135 cubic yards of petroleum hydrocarbon impacted soil was accomplished during December 1992. Based on the information provided in the PEA report, the site shows no evidence of contamination that may constitute a threat to human health and/or the environment. Therefore, the Department concurred with the recommendation that "No Further Action" was needed at the site.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Site Screening
 Completed Date: 10/16/1992
 Comments: The Department received a verbal notification from the City of Simi valley regarding a diesel release to the city property from a truck overturn. A PEA is required due to the documented release of hazardous substance.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 12/02/2020
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 12/02/2020
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020
Date Data Arrived at EDR: 10/20/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by HDR Engineering Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

Coordinates:

P.O.#	NA	Latitude:	34.2719 34° 16' 19" North

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by HDR Engineering Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 7C6C-4D54-BAA7

PO # NA

Project 10251962

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 7C6C-4D54-BAA7

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

HDR Engineering Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Appendix E. Site Photographs

Taken February 2, 2021

This page is intentionally blank.

Photo 1: The walking/bicycle path at the eastern extent of the Project footprint was adjacent to a surface drainage channel. The view is to the northeast.

Photo 2: Markers for an underground gas line were present at the Hidden Ranch Drive grade crossing. The view is to the northwest.

Photo 3: The Hidden Ranch Drive grade crossing had signals and a signal house. The view is to the east.

Photo 4: The passenger platform of the Simi Valley Metrolink Station had open canopy structures but no enclosed buildings. The view is to the northwest.

Photo 5: The southern part of the proposed laydown area had a storm drain and remnants of concrete footings. The view is to the north.

Photo 6: The western part of the proposed laydown area had another storm drain and block of concrete that contained several steel rails. The view is to the west.

Photo 7: The East Los Angeles Avenue grade crossing was located adjacent to a lumber storage yard and a property under construction. The view is to the northwest.

Photo 8: This property located at the eastern extent of Industrial Street was under construction, north of the East Los Angeles Avenue grade crossing. The view is to the south.

Photo 9: Gates and signals were located at the Tapo Street grade crossing. The view is to the west.

Photo 10: A signal house, signals, and communications tower were located east of the Tapo Street grade crossing. The view is to the east.

Photo 11: Commercial and retail businesses were located south of the Sequoia Avenue grade crossing. The view is to the southwest.

Photo 12: Additional signal and switch houses were located to the east of the Sequoia Avenue grade crossing. Markers for underground fiber optic lines were present throughout the Project footprint. The view is to the east.

Photo 13: The Sycamore Drive grade crossing included additional signal houses behind security fencing. The view is to the northeast.

Photo 14: The pedestrian grade crossing at Sycamore Drive was relatively new and included separate gates and signals. The view is to the northwest.

Photo 15: The western extent of the Project footprint was located north of a motor home storage yard. The view is to the southeast.
